

Radiology team scheduling made **smooth.**

Finish in minutes
instead of weeks

- Incorporates complete, detailed scheduling policies
- Delivers equitable schedules with proof points
- Automatically builds comprehensive staffing schedules in minutes
- Simplifies request submission, tracking, and processing
- Provides access anywhere, anytime

Build a fair schedule for your department automatically, without weeks of planning and manual schedule comparisons.

Do you spend too much time creating a schedule for your department? Could you benefit from a single system for tracking all items related to scheduling, including vacation requests? Are you frequently adjusting your schedule to account for manual errors? Does your staff sometimes complain about working too many holiday shifts? Can your staff view their schedules on their mobile device?

Momentum is the only intuitive, automated radiology staff scheduling software capable of ensuring equitable physician and staff scheduling, taking business demand, practice policy, and individual preferences into consideration during the scheduling process. Unique to the radiology industry, Momentum ensures assignments are distributed equitably amongst all doctors and staff, taking holidays, vacation requests and development or training days, and individual job functions into consideration.

What separates Momentum from other automated staff scheduling tools is our unique algorithm. The back-end rules engine is more comprehensive and powerful than any competitive product. After our extensive scheduling documentation and encoding process is complete, customers have a complete, rules-based scheduling software system that simplifies request processing and produces equitable schedules in minutes.

Features

- Scheduling algorithms based on your own scheduling rules and policies streamline complicated processes
- Delivers equitable schedules with proof points
- Automatically builds comprehensive staffing schedules in minutes
