

Makes clinical trial workflow **smooth.**

Know what's
going on,
everywhere,
always.

- Control research workflow start to end
- Collaborate with sites, labs, monitors and partners
- View enterprise-wide study status at a glance
- Exchange information in real-time
- Configure milestones, get automated notifications

Enhance visibility, improve collaboration, and proactively manage workflow with a single, unified system... Clinical Conductor™.

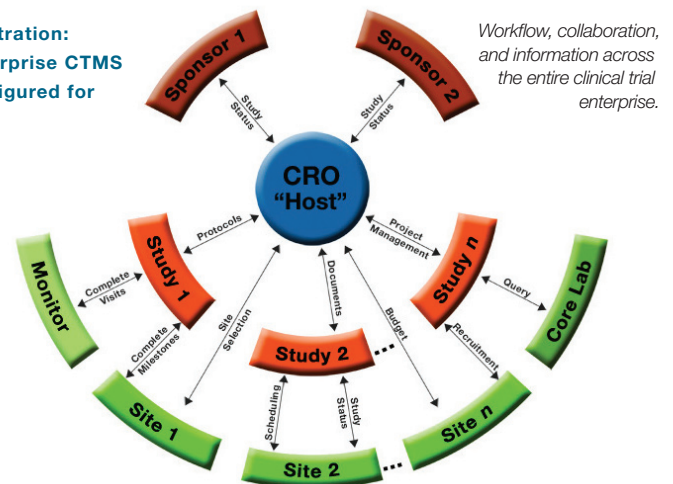

Do you have on-demand, up-to-date information on study progress? Are you able to communicate protocol changes to all sites at the same time? Do you have ready access to documentation? Are you able to resolve queries quickly? Do you know which sites are ahead or behind in recruiting? Are you notified real-time of important events? Do you have concrete metrics to pick the best sites and partners?

Clinical Conductor™ Enterprise CTMS, the industry's most collaborative system for clinical trial management, enables proactive, portfolio-wide trial workflow management, real-time information exchange, and visibility over the entire network of sites and partners, resulting in shorter timelines and lower costs.

Features

- Business development allows opportunity tracking and management
- Streamlined study protocol setup and distribution enables accurate, synchronized studies across all sites
- Comprehensive study contracting, budgeting, and cash flow projections provide visibility to expected financial performance
- Concrete metrics and tools optimize site, lab, monitor, and partner selection
- Study dashboards for portfolio-wide oversight and complete workflow management shorten timelines
- Real-time metrics and visibility to site recruitment performance enable earlier corrective action
- Monitor visit planning, action tracking, and data-driven scheduling
- Document sharing and storage enables real-time availability and easy review with all partners
