

Makes clinical research workflow smooth.

Manage your trials,
not just your data.

- Control trial workflow start to end
- Recruit from your database and track marketing results
- Schedule patients, staff and resources automatically
- Manage and analyze finances proactively
- Use real-time metrics to improve performance

Execute more quickly, reduce costs, and improve results with
a single, unified system... Clinical Conductor™.

Do you have on-demand, up-to-date information on your trial status? Can you see the overall financial status of all trials? Can you easily screen your patient database for appropriate participants? Are you referencing multiple calendars before scheduling appointments? Can you tell how effective your recruiting campaigns have been? Are you manually reconciling payments and invoices?

Clinical Conductor™ Site CTMS, the industry's most comprehensive system for clinical trial management, streamlines every aspect of trial execution, enabling you to manage and execute trials more easily and efficiently, resulting in quicker trials and lower costs.

Features

- Central location for all clinical trial information, available real-time, eliminates disconnected, manual processes, spreadsheets, and redundant data
- Streamlined recruitment with database querying, optimized tools, automated invitation, and enrollment confirmation capabilities
- Automated marketing campaign tracking shows return on investment
- Streamlined study protocol set-up and execution, with comprehensive resource and financial details, minimizes repeat work and misses
- Centralized, automated scheduling for patients, physicians, staff and equipment
- Powerful project analysis provides an instant pulse on project status and objectives, with forecasting and planning tools
- Detailed financial analysis, automated financial transaction, and integrated patient stipend payments, keep the trial site on budget, while minimizing manual data entry
- Comprehensive metrics provide proof points for sponsors and improvement efforts
- Hosted solution accessible via web-browser minimizes IT investment and provides access anywhere, anytime, with completely configurable role-based security
- Caring customer support team provides training, helps you deploy, and addresses your questions and needs
- Optional modules for enhanced recruitment, business development, patient stipend debit cards, and project management
